Is It Safe?

No Way! OSHA defines a hole as a gap or open space in a floor, roof, horizontal walking-working surface, or similar surface that is at least 2 inches (5 cm) in its least dimension. Employers must protect employees from falling through any hole, including skylights, that are 4 feet (1.2 m) or more above a lower level by a cover, guardrail system, travel restraint system, or a personal fall arrest system.

If you have a photo of a workplace situation that you would like to share, send it to us! We may use it in the Safety Scoop for others to learn from!

Contact [Joe](#), [Chuck](#), or [Catrina](#) at 1-844-8SAFETY to submit your photo.
