## SAFETY SAM INSIDER TIP...

Safety Made Simple's learning management system (LMS) offers a simple, efficient, and effective way to document employee training. Training can be tracked by employee, location, job classification, or custom field. Customized reports can be automatically delivered to a supervisor or manager's email inbox at a defined frequency. Report data can also be downloaded to Microsoft Excel. It's that simple! [Contact us](#) to learn more.

## TAKE 5 SAFETY MESSAGE

**This Month's Take 5 Safety Message: "Road Safety – Farm Equipment"**

According to the United States Department of Agriculture, there are about 15,000 highway accidents involving farm equipment each year in the United States. This **Take-5** covers 5 tips for driving on rural roads and highways.

This and other "Take-5's" can be accessed by your **Safety Made**

## Featured Course

### Food Safety Course "Allergen Handling"

Upon completion of this course, learners will be able to identify the nine major allergens recognized in the United States, understand how cross-contact occurs and how to prevent it, and apply safe practices to help protect those with food allergies.

**Safety Made Simple** offers a wide range of food safety courses. [Click here](#) to view our searchable online course catalog.

## Announcements:

## This Month's Safety Simplified Blog - "Fall Protection Calculations"

Using a personal fall arrest system (PFAS) without evaluating fall clearance is like bungee jumping with a bungee cord that is too long. It places workers in a situation that can result in severe injury and death. Prior to using a PFAS, employees must have a basic understanding of fall clearance. Click [here](#) to read the blog in its entirety.

## Is It Safe?

### Not a Chance!

This drag conveyor is not properly guarded. Drag conveyors have an in-running nip point (pinch point) where the chain contacts the sprocket. Workers can be injured when hands and fingers come in contact with nip points on drag conveyors. Drag conveyors should be fully enclosed. If visual inspection is needed to verify product flow, permanently affixed grids or polycarbonate shields can be installed.

**Safety Made Simple** offers courses on machine guarding and screw and chain conveyor maintenance. [Click here](#) to view our searchable course catalog.

If you have a photo of a workplace situation that you would like to share, [send it to us!](#) We may use it in the Safety Scoop for others to learn from!
